

Building Strong Foundations to Confidently Navigate Regulatory Change

August 13th, 2025

PRESENTERS

Chelsea Davis

Senior Product Manager, **Atrius**

Kristopher Zebrowski

Customer Success Manager, **Atrius**

CARBON ACCOUNTING

Atrius Sustainability

Accelerate your journey to **net zero**

- ✓ Drive cost, energy, and carbon savings
- ✓ Accurately report to stakeholders and relieve external pressures of pending regulations
- ✓ **Dedicate more time to driving carbon reduction**

ENERGY MANAGEMENT

Atrius Energy

Automate your **energy data** collection, analysis, and reporting

- ✓ Reduce manual reporting and spreadsheets
- ✓ Gain access to organized high-resolution point-level details on energy and resource use
- ✓ **Generate baselines for goal setting and identify areas for improvement**

Question 1

- What has been the most valuable step or practice you've taken when building an adaptable, long-term energy strategy?

Question 2

- In your organization, how does energy data support not only compliance but also business continuity, cost control, or strategic planning?

Question 3

- How do you currently use energy data to guide operational decisions or negotiate with utilities?

Question 4

- Are you using building management systems, IoT sensors, or other technologies to gain deeper visibility into your energy use? If so, how?

Question 5

- If tools like Energy Star Portfolio Manager were no longer available, how would your organization continue tracking, benchmarking, and reporting?

Question 6

- How is your organization preparing for grid pressure, outages, or rising power demands? Are you exploring on-site generation, battery storage, or flexible procurement strategies?

Question 7

- How do you centralize and share energy data across different locations or with multiple stakeholders (executives, partners, government agencies)?

Question 8

- If you could give one piece of advice to another organization starting or strengthening their energy strategy, what would it be?
